## Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

*Claim Rejections - 35 USC § 103*

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

3. Claims 14-21 are rejected under 35 U.S.C. 103(a) as being unpatentable over Chennakeshu (U.S. 6314081 B1).

Regarding claim 14-19, Chennakeshu teaches (column 6, lines 1-38 and figure 4) a method of receiving a message on a digital control channel for use in a cellular messaging network, comprising: receiving voice channel assignment signals related to the assignment of voice channels and short messaging signals based on the message from the digital control channel, and distinguishing between voice and data.

Chennakeshu does not teach discarding voice channel assignment signals. However it would have been obvious to one of ordinary skill in this art to adapt to Chennakeshu's system discarding the voice signals or any unwanted signals to avoid sending the wrong signal and to

make space for more signals that need to be transmitted therefore avoiding congestion in the system.

Regarding claim 20, as for demultiplexing the digital control channel, it is inherent Chennakeshu's system that demultiplexing takes place in order to decipher the voice signals from data signals.

Regarding claims 21, as for paging a receiver in the cellular messaging network, Chennakeshu does not teach paging. However, it would have been obvious to one of ordinary skill in this art to adapt paging to Chennakeshu's systems as paging is well known in the art.
